PROFESSIONAL SUMMARY

Motivated 7th-semester Software Engineering student with a strong foundation in software engineering principles and a focus on writing clean, structured, and maintainable code. Experienced in developing mobile applications using Flutter and Firebase, with a continuous drive to strengthen problem-solving and system design skills.

EDUCATION

Bachelor of Science in Software Engineering

NUML, Islamabad — 7th Semester Completed

Intermediate (ICS)

Pre-Engineering / Computer Science

Matriculation

Science

PROJECTS

Speech Therapy App — Final Year Project (Flutter & MongoDB)

- Designing and developing a mobile application to support speech therapy through structured, interactive exercises.
- Built the front end in Flutter, focusing on an accessible and user-friendly interface.
- Used MongoDB for backend data storage and management.
- Applied clean architecture and modular design principles for maintainability and scalability.

Medicine Reminder App — Flutter & Firebase

- Developed a mobile application to help users manage daily medicine schedules.
- Implemented Firebase Authentication and Firestore for secure, real-time database management.
- Designed a responsive and intuitive user interface using Flutter.
- Integrated reminder notifications to improve the overall user experience.
- Followed modular coding structure and clean architecture principles throughout development.

TECHNICAL SKILLS

Languages & Frameworks: Flutter, Dart, C++, Java (Object-Oriented Programming)

Backend & Database: Firebase (Authentication, Firestore), Database Concepts

Web & Tools: HTML, CSS, Git & Version Control

SOFT SKILLS

Problem-Solving Mindset • Clear Communication • Time Management • Adaptability • Continuous Learner
